## *A Birthdate by Kuthumi*

“A Birthdate is a new beginning because the cycle of each lifestream completes a circuit every 365 days a year and the energy of that individual’s world closes the circle of experience on the day preceding one’s birthday.

On the day which is the anniversary of the embodiment of the Spirit, the Holy Christ Self releases a new pulsation of Light and Life into the four lower bodies, and from the Presence there comes an added forward impetus with the hope that the succeeding year will find a greater expression of the individual’s life plan.

This is why it is usually noticed that in the period just preceding one’s birthday there is a let-up of life’s energy and vitality and the period following the birthday is usually the most opulent in spiritual unfoldment and inner well being.

As the embodiment of the Spirit gives new opportunity for such a one to unfold his/her spiritual nature so is a minor cycle in each birthdate a new beginning and a great deal of the accumulation of the lifestream, which the individual has drawn about him or herself, is dissolved at this time. It is also the privilege and opportunity of the Ascended Hosts to give gifts of their qualities to that lifestream, even as unascended beings proffer them their gifts in the material state.

Every person who passes through the gates of a new birthdate receives an outpouring from every Ascended Being. The practice of extending gifts here below is but a faint reflection of that inner experience.

When an individual becomes a student of the Masters and under the direction of the Ascended Hosts, he or she receives such a Cosmic outpouring on that one’s birthday as to make it the holiest day of the year.

On your birthday, your lifestream is played upon by all the Cosmic friends in the Kingdom of Eternal Freedom. The richness, the opulence, the spiritual illumination which they will give to you will remain a part of your eternal identity for all time. Avail yourselves when this holy day comes and bathe in the effulgence of the Presence of the Godly.”

To the little child within you, to you yourself, in each year of your life on each birthday, I give the kiss of the Christmas Rose and I seal you, each and every year unto the present, beloved. Know that my love is sufficient unto you to resolve every unresolved problem--a spiritual problem, a problem in the psyche or in your

psychology, a problem of the mind or the heart or the desires. This kiss, beloved, is there for you to accept and, with it, to accept the healing of the experiences of that year of your life.

O my beloved, remember when your birthday comes that you have the privilege of directing to the Great Central Sun your gratitude for life. And over the crystal cord rippling into the heart of God, send your call of joy and joy in the Lord. For on your natal day you may also offer a petition to Almighty God for a certain dispensation on earth and on that day, as on no other day in your birth year, is there the opening of the heart of God for the very special dispensation for life, providing that your prayer is always for others, that you might give a gift of God from your heart to the evolutions of earth.
